IP Phone is a SIP IP feature phone which work on both IPv6 and IPv4 network address simultaneously. It supports up-to 3 register accounts and each account can be configured to access IPv4 or IPv6 network SIP Server freely. It makes migration from IPv4 to IPv6 network smoothly.

IPv6 SIP IP Phone is ready to Market

IPv6 address was developed for years, however, it was not practical to our life up to date. More and more electronic devices are able to link to IP Network, this makes existing IPv4 address supply in shortage to global market. Meanwhile, the emerging countries are not able to increase IPv4 address supply due to strong market demand on broadband services. Corecasys is an SIP based IP Phone which built-in both IPv6 and IPv4 IP address. No matter when you are ready to deploy IPv6 network now, or reserve the future expansion to IPv6 from existing IPv4 address, Corecasys is ready to go. Both IPv6 and IPv4 address are working simultaneously at Voice IP Call. Its flexibility of both IPv6 and IPv4 accept and interwork both addresses on today and tomorrow when you need

select freely up to 3 SIP service Accounts

Corecasys is appropriate to use for VoIP Service Providers, IP Centrex service and IP-PBX within offices and remote branch offices. Up to 3 SIP Server (or ITSP Service provider or alternative IP-PBX) can be configured at Corecasys simultaneously no matter where they are seated at IPv6 or IPv4 network address.

Rich Telephony Features

Corecasys is compatible with most brand name IPv4 and IPv6 SIP server or IP-PBX server with a variety of telephony features which are similar to legend digital PBX features and operational behaviors. Corecasys receives Instant Messages (IM) which comes from IP-PBX server, SIP Server or IP Centrex server and show on front panel by LCD and LED Light. It is easy for you to retrieve IM messages by one tough key. Corecasys provides flexible talking facility to switch among them such as Handset, Hand free Phone and Headset ear phone and microphone for heavy phone call user. The phone book name list can be searched intelligently. When one letter was entered, the related consequent name
